Maioliche' String Light Lumet System starting from 10 m with fabric cable,
3 lamp holders and lampshades, hook and black plug

Light bulb: Without bulb

Finish: Majolica Blue

Description

Summer sunsets, laughs, pool parties. No, this isn't the plot of a californian romcom, it's the mediterranean way of life! Check out our new Lumet string light with lampshades in majolica patterns. To add a warm, mediterranean touch to any evening.

You can pair this dazzling garland - in all of its 10 metre glory - with three lamp holders in colourful or floral motifs and use it for any outdoor space since its components are designed to withstand any weather or level of humidity (thanks to their IP44 protection degree). And for a warm, starry night, just switch your lights (and your phone) off and enjoy.

Please note that these images are just examples used to inspire. What makes Lumet truly special is your freedom to place these lamp holders wherever you want along the string light, in a simple and precise manner.
